CAREER OBJECTIVE

Aspiring Full-Stack developer seeking a role in an innovative organization to leverage my coding expertise and problem-solving skills for impactful project contributions. Eager to collaborate with experienced professionals in a dynamic environment that fosters growth and creativity.

WORKING EXPERIENCE

- | | |
|--|--------------------------------------|
| ▪ Mediusware Academy Ltd
Trainee Full-Stack Developer. | June 2024 – Sep 2024 |
| ▪ Goinnovior Limited
Software Developer (Intern). | November 2023 – February 2024 |

TECHNICAL SKILLS

- | | |
|---|--|
| ▪ Programming & Scripting Languages
C++, Python | ▪ Analysis and Visualization
Machine Learning, NLP (R&D) |
| ▪ Scripting Languages
HTML, CSS, Tailwind, Bootstrap,
JavaScript, TypeScript. | ▪ Database & Advanced Database
MySQL, MongoDB |
| ▪ Framework & Libraries
React Js, Node Js, Express Js,
Firebase, Next Js. (R&D). | ▪ Operating System & Software
Windows, Linux, Github
Figma, Trello. |

ACADEMIC PROJECTS

- **Mediusware Ltd. & Mediusware Academy**
Built a full-stack web application utilizing HTML, Tailwind CSS, Sass, TypeScript, NextJs, and Django REST API.
Link: <https://mediusware.com/> Link: <https://mediusware.com/academy>
- **Blood-Donation Solution**
A comprehensive full-stack project developed with JavaScript, Tailwind, ReactJs, ExpressJs, MongoDB and Node-mailer, featuring user registration, login, and logout functionalities with JWT authentication and authorization.
Code: https://github.com/ahnafhasnainAiub/Blood_Donation
- **Lumen Corporation Ltd.**
Constructed a corporate portfolio utilizing HTML, CSS, Tailwind, React.js and Email.js.
Code: https://github.com/ahnafhasnainAiub/Lumen_Corporation Link: <https://lumen-bd.com/>
- **Company Task-Todo**
A full-fledged MERN stack project featuring user registration, login, and logout using JWT authentication, as well as CRUD operations, sorting, searching, and filtering capabilities.
Code: https://github.com/ahnafhasnainAiub/Mern_Todo_App

▪ Travel Hunt

Developed a comprehensive Production Hotel Booking App using HTML, CSS, Tailwind, NodeJs, Express, EJS, MongoDB, Mapbox, and Cloudinary. The app includes CRUD operations for hotel listings, the ability to add and delete one's own reviews, hotel search functionality, authentication and authorization at every important step.
